

**I'm angelo
and I do stuff**

(please read for more)

cover letter

I am a versatile and adaptable professional. Graduated in journalism, I worked as a designer and programmer for 5 years at Folha de S.Paulo, creating daily newspaper's pages websites for special features.

I navigated between design and programming without major obstacles. I develop mockups, write code and easily apply design. I write, film, edit, print, experiment, and solve problems.

I try to use what I learned in the dynamics of a newsroom in other professional environments: little margin of error, agility in solving questions and group work.

I am available to learn new technologies, languages and ways of working. My versatility is my highest quality and I want to keep perfecting it.

Programmer

I have experience in dynamic environments, lean teams and incremental development.

I try new ways to streamline team work, make it more reliable, and eliminate noise. I do a lot of things — from programming to writing fiction.

I am versatile and adaptable.
